

**Kuraray composites offer unique applications for each patient. Kuraray CLEARFIL Majesty Esthetic offers intuitive shade matching, while CLEARFIL ST Opaquer provides a mask for patients to hide discolored teeth and metal darkness. Kuraray composites include universal light-cure, flowable, posterior, and opaque composites for variety and flexibility in applications.**

### **WHY CLEARFIL Composites?**

- Advanced esthetics in light diffusion and polish-ability
  - Exceptional strength
  - Flexible shade matching
- Low polymerization shrinkage, and radiopacity
  - An easy to use product from a certified biocompatible integrated system

### **Restorative Composites**

**Clearfil Majesty ES2** ~ 14 basic shades (Enamel & Dentin in 1), 9 specialty shades, light cure, unsurpassed natural shade blending with surrounding tooth structure, easy sculpting

**Clearfil Majesty Posterior** ~ 6 shades, light cure, highest filler loading, high surface hardness, close to human enamel, high wear resistance, easy handling

**Clearfil Majesty Flow** ~ 12 shades, flowable, superfilled, light cure, proprietary new surface technology, very high filler loading, exceptional strength and wear, optimal cosmetic results

### **Core Build-Up Composites**

**Clearfil Photo Core** ~ cuts like dentin, easy handling, radiopaque, non-stick, high polymerization depth, no increments needed, esthetic translucent shade

**Clearfil DC Core** ~ superior compressive strength, superior flexural strength, dual-core composite, cuts like dentin, durable, not sticky, radiopaque, easy application with no syringe
